SHEPPERTON MARINA

NO SINGLE USE PLASTIC POLICY

AVOID | REUSE | REFILL | RECYCLE

Our commitment

Shepperton Marina is committed to eliminating avoidable single-use plastics from our purchasing, operations and events. We will not buy, supply or use them for marina business where a safe, suitable reusable or plastic-free alternative is available.

We will prioritise reusable bottles, cups and serviceware, refillable supplies and reduced packaging, and work with suppliers, contractors and event traders to support these standards.

How you can help

Please support this commitment and follow the marina's Waste Management Plan.

Bring reusables. Choose refillable bottles, reusable cups and shopping bags, and avoid unnecessary disposable items.

Refill safely. Use only points clearly identified as drinking water. Do not refill drinking bottles from standpipes marked "No Drinking Water".

Use the right bin. Follow the bin labels and separate your waste. Keep compostable plastics out of normal plastic recycling. Only put them in food-waste bins if the marina confirms an approved collection route.

Keep plastic out of the water. Secure bags, packaging and waste. Never flush wipes, even those labelled "flushable". Report litter or pollution to staff; never enter the water to retrieve it. Balloon releases and loose confetti are not permitted at marina events.

Safety and accessibility come first

Essential medical, accessibility, hygiene, protective equipment and spill-response needs are protected. You may bring and use items needed for disability or medical reasons without prior approval or proof of need. Durable reusable plastic equipment is not targeted by this policy.

Our commitment is to eliminate avoidable single-use plastics, not a claim that the marina is already plastic-free.

Thank you for helping keep our marina and the River Thames free from plastic litter.
