SHEPPERTON MARINA

INTRODUCING OUR GREEN TEAM

Working together for a cleaner, greener and more sustainable marina

A group of Shepperton Marina staff have volunteered to spend one day each month focusing on practical ways we can reduce our environmental impact and improve the marina for everyone.

WHAT WILL THE GREEN TEAM DO?

MONTHLY MARINA WALK-AROUND

Look for opportunities to reduce waste, prevent pollution, save water and energy, improve recycling and identify areas needing attention.

PLANTING & BIODIVERSITY

Introduce and maintain suitable planting, improve green spaces and look for practical ways to support wildlife and biodiversity around the marina.

INFORMATION & AWARENESS

Share useful environmental information through notice boards, emails, newsletters and other marina communications.

ENCOURAGE EVERYONE TO TAKE PART

Support colleagues, tenants and berth holders with simple, achievable ways to make more sustainable choices.

MONITOR OUR PROGRESS

Track actions and improvements, review what is working and identify where further changes could make a difference.

REVIEW POLICIES & PRACTICES

Help review environmental policies and everyday procedures so sustainability remains part of how the marina operates.

OUR FIRST YEAR

START	Initial walk-around, map priorities and agree action list. Review suppliers/products, source environmentally friendly alternatives.
MONTHS 2-4	Focus on waste and recycling, planting opportunities, water use and energy-saving ideas.
MONTHS 5-8	Build customer and tenant engagement, review pollution prevention and carry out seasonal improvements.
MONTHS 9-12	Review progress, complete priority actions, agree the next year's sustainability programme. Create a report on achieved results.

HOW YOU CAN HELP

Use the correct waste facilities • Reduce unnecessary water and electricity use • Prevent litter entering the water • Report leaks, spills or environmental concerns • Look out for Green Team updates and initiatives

Small changes, made together, can make a real difference.

Thank you for helping us keep Shepperton Marina clean, responsible and sustainable.
